

Product Requirements Document — GiT Website

PREPARED FOR	Grow In Tech (GiT), University of Ibadan
BASIS	Innotech-Web codebase review + GiT brand & programme materials
VERSION	v1 — Draft for review
DATE	[Insert date]

1

Overview

GiT needs its first public website: the permanent home for the community once the Kommunity launch graphics go out, and the landing point every other GiT asset — the sponsorship prospectus, partnership proposals, social posts — should point back to.

This PRD reuses the codebase already built for Innotech ("Innotech-Web") as the technical starting point — same stack, same component patterns where they fit — reskinned into GiT's brand and restructured from Innotech's single landing page into the multi-page site GiT actually needs.

2

Background — what we're starting from

The Innotech codebase is a working single-page site:

LAYER	CHOICE
Framework	React 19 + Vite (rolldown-vite)
Language	TypeScript
Styling	Tailwind CSS v4
Animation	GSAP + @gsap/react (ScrollTrigger, marquee loop)
Routing	react-router-dom installed, unused (site is single-page)

Existing structure: Nav → Hero → Sponsor (logo marquee) → Our Impact (four stat cards) → About (Inception) → Our Signature Tracks (Hack card).

This is a solid pattern — a pill-shaped floating nav, a full-bleed hero, a stat-card grid, a marquee — but it is built for one event, one page, and Innotech's teal-on-black identity with an unrelated stock visual (a classical statue) in the hero. None of the visual identity carries over. The component shapes do.

3

Goals

- Give GiT a real, permanent public presence before the Kommunity launch
- Make a non-technical, creative visitor feel invited within the first screen — same standard as the launch graphics brief
- Give every other GiT document one canonical link to send people to
- Support the two live workstreams without a rebuild: the Digital Skill Up 2026 collaboration, and the founding committee call
- Be maintainable by students, not a specialist — content changes shouldn't require touching component code

4

Non-goals (v1)

- No member login, dashboard, or authenticated area
- No CMS — content is hardcoded in components for v1; a headless CMS is a v2 consideration
- No payment processing — sponsorship and donations route to existing forms/bank details
- No blog backend — if it ships in v1, it's a static list, not a publishing system

5

Audience

PERSONA	WHAT THEY NEED FROM THE SITE
Prospective member (any department)	Understand GiT fast, see it's not "just for coders," find how to join
Prospective committee applicant	Founding roles, what's expected, how to apply
JCIN UI / partner organisations	Credibility, track record, a page they can point their exec team to
Sponsors	Path into the sponsorship prospectus / Code & Culture Summit materials
Existing members	Event calendar, what's coming next

Sitemap

Carried over from the structure already agreed, now scoped page-by-page.

6.1 Home

- Hero: headline, one-line mission, primary CTA (Join) + secondary CTA (See Programs)
- Track record strip — reuse the Sponsor marquee pattern for partner/institutional logos
- Impact stats — reuse the Our Impact four-card pattern, populated with GiT's real numbers
- Featured event: whichever is live — currently Digital Skill Up 2026
- Get involved teaser: Join + Committee CTA cards

6.2 About

- Mission, vision, core values
- Background and inspiration — the "gap on campus" story
- Track record table: Innotech 2.0/3.0, Tech-X, Classroom to Career, QUACINTO 1.0
- Founding team — placeholders until the committee call closes

6.3 Programs

- The six tracks: Digital Marketing, Copywriting, Graphic Design, Vibe Coding, Automation, Financial Literacy
- Reuse the Hack card pattern — one per track, not one card holding a paragraph
- Each track: three-session structure, facilitator (once confirmed), outcome

6.4 Events

- Event list/calendar, most recent first
- Live: Digital Skill Up 2026 (16–18 Sept), in partnership with JCIN UI
- Upcoming: GiT Code & Culture Summit 2027
- Past: the five track-record events, as a credibility archive

6.5 Get Involved

- Join GiT (general membership) — form or external link
- Founding Committee — nine roles, requirements, application link
- Sponsor / Partner — short teaser linking to the sponsorship prospectus, not duplicating it

6.6 Blog & Contact

- Contact form or mailto (git.kommunity@gmail.com, pending the spelling decision — see §10)
- Social links
- v1: contact only. A static "recent updates" list can follow, or defer to v2

Design system

7.1 Brand

GiT's own identity, not Innotech's — the boxed "GiT" wordmark, near-black base, vivid blue accent, ice-blue tint, white space.

ROLE	COLOUR	HEX
Base	Near-black	#0F1D1D
Accent	Vivid blue	#1379F1
Light	Ice blue	#B6DCFC
Base	White	#FFFFFF

7.2 Typography

Innotech uses Orbitron (headings) + Geist Mono (body) — a sci-fi/terminal pairing that fits Innotech but works against GiT's "not just for coders" positioning. Replace with:

- Headlines: a bold italic sans — Nimbus Sans L Bold Italic per the brand deck, or a web-safe equivalent (Archivo / General Sans, 700 italic)
- Body: a clean grotesque sans, regular weight, generous line height

7.3 Visual language

Follow the same rules set for the Kommunity launch graphics — this site should feel like the same campaign:

- No circuit boards, terminal green, robot imagery, or matrix rain
- Real student photography where available, duotoned in brand blue, over flat geometric illustration
- Generous white space — the current Innotech layout runs dense; GiT's should breathe more
- The boxed GiT mark placed with intent, not repeated as decoration

7.4 Reusable interaction patterns (keep from Innotech)

- Floating pill nav with the scroll-triggered width animation
- Logo marquee (GSAP-driven, infinite loop) — repoint at partner logos
- Scroll-triggered reveals via @gsap/react + ScrollTrigger

Content already available

Pull directly from existing GiT materials rather than redrafting.

ELEMENT	CONTENT
Mission	To equip students with practical, in-demand digital skills through hands-on training, mentorship, and community — regardless of department or prior technical background.
Vision	A generation of University of Ibadan students confidently building, creating, and competing in the digital and AI-driven economy.
Core values	Practical over theoretical · Community first · Accessibility · Credibility
Track record	Innotech 2.0 (2021, 600) · Innotech 3.0 (2022, 800) · Tech-X Conference (2022, 1,200) · Classroom to Career (2023, 1,200) · QUACINTO 1.0 (300) — 4,100 total
Programmes	The six Digital Skill Up / Intelligent Creator Workshop tracks
Contact	Ezeocha Obioma (GiT Lead) · +234 816 286 0397 · git.kommunity@gmail.com

Functional requirements

REQUIREMENT	PRIORITY
Multi-page routing (react-router-dom, already installed but unused)	P0
Responsive — mobile-first, since most campus traffic is phone-based	P0
Join / Committee application — embedded form or external link for v1	P0
Event detail pages/sections for Digital Skill Up 2026	P0
Partner/sponsor logo strip (marquee)	P1
Contact form or mailto	P1
Static blog/updates list	P2
CMS-driven content	Deferred to v2

1 0

Open decisions — needed before build starts

- Kommunity vs Community spelling — launch graphics use "GiT Kommunity"; the sponsorship prospectus and JCIN UI proposal use "GiT Community." The site makes this permanent and visible everywhere.
- Domain name — currently only a Vercel preview URL exists (for Innotech). GiT needs its own domain or subdomain decided.
- Join/Committee form backend — embedded form vs. external link, affects whether this is a v1 or v1.1 item.
- Founding team photos/bios — blocked on the committee call closing.
- Whether Events includes the Summit yet — the Code & Culture Summit 2027 prospectus is still in progress.

DECIDE FIRST — Lock the Kommunity/Community spelling before any page ships — it is the single most visible, most permanent instance of this decision across all GiT materials.

Success metrics

- Site live before Digital Skill Up 2026 publicity opens (12 August target per the partnership proposal timeline)
- Every other GiT document links to the site rather than a form or PDF directly
- Join and Committee CTAs are one click from the homepage, no scroll required above the fold

Phased rollout

PHASE	SCOPE
Phase 1	Home, About, Programs, Get Involved (Join + Committee), Contact — reskin only, content from §8
Phase 2	Events section with Digital Skill Up 2026 detail page
Phase 3	Blog/updates, Summit placeholder, CMS evaluation

Prepared for Grow In Tech (GiT), based on a review of the existing Innotech-Web codebase and GiT's current brand, programme, and partnership materials.
